A Day
on the
Plains

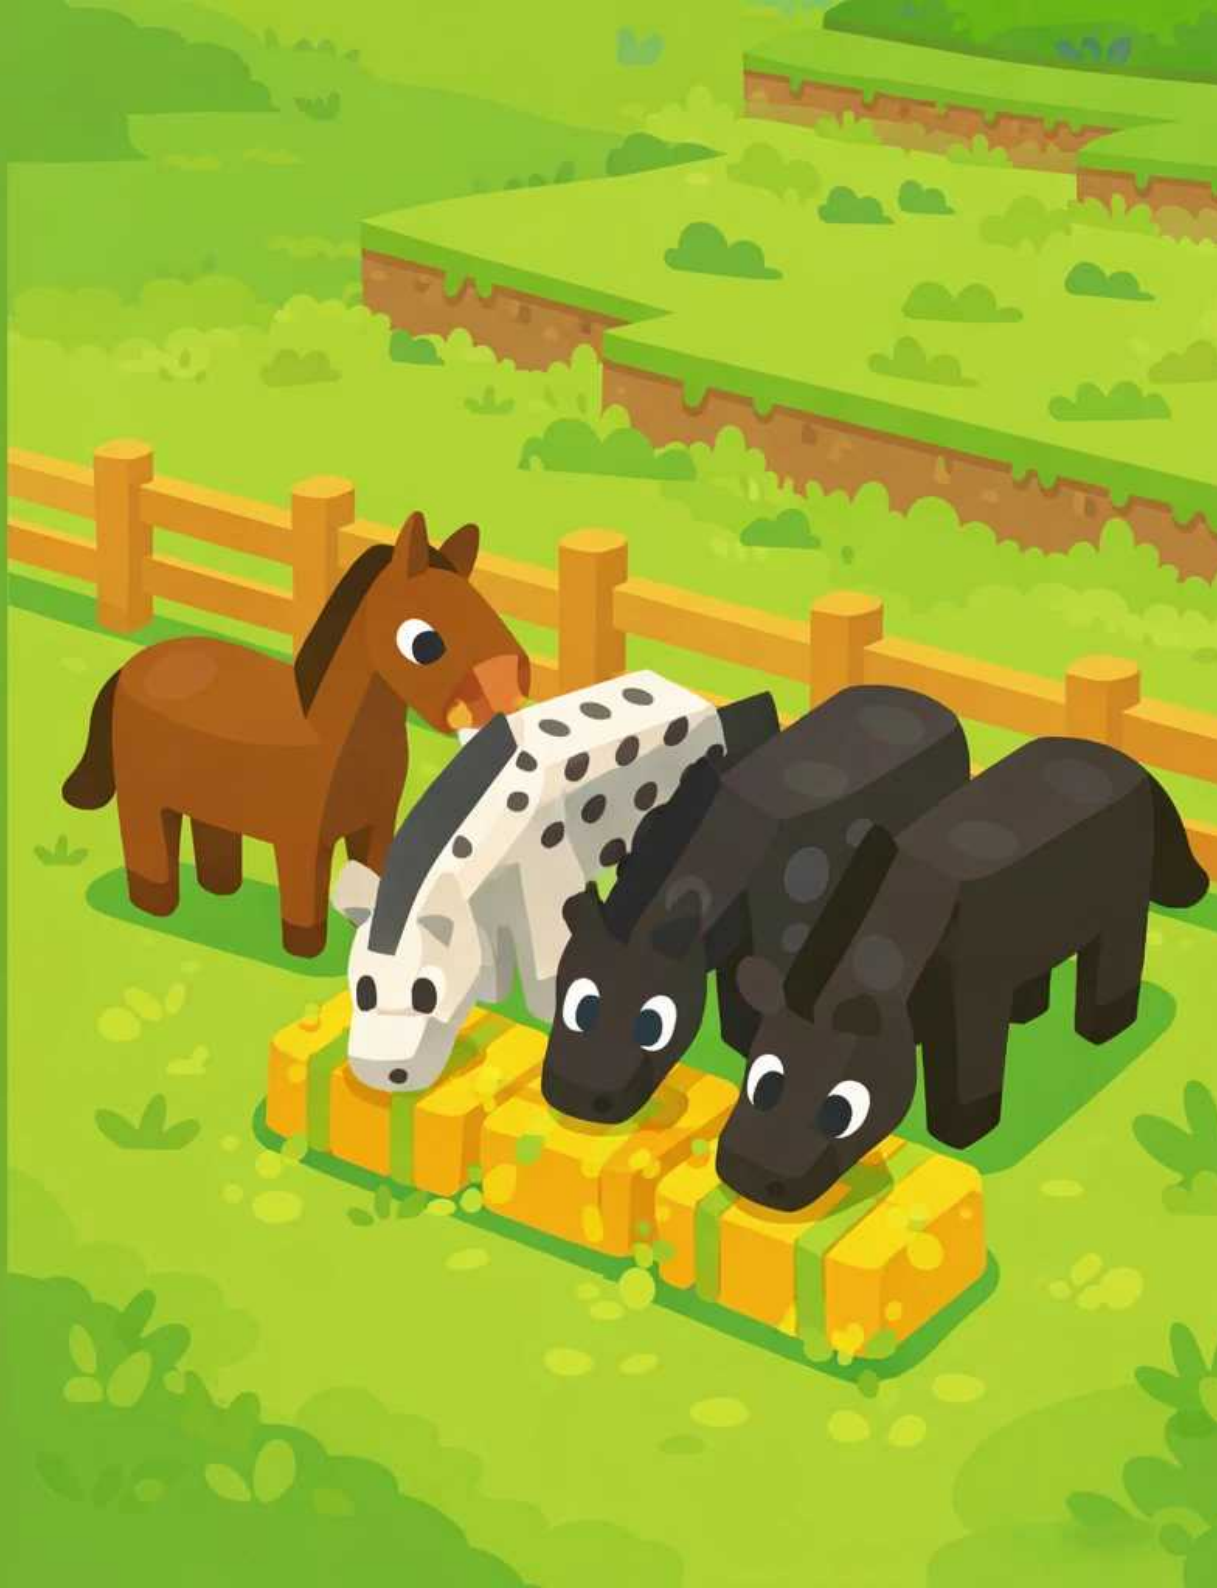
Plains are wide,
flat, and green.
A hen pecks by
the birch tree,
and you can
see a long **way.**

The **plains** hold many animals. A pig sniffs along the **trail**, and a cow **stays** in the shade. Both **may** find a snack in the grass.

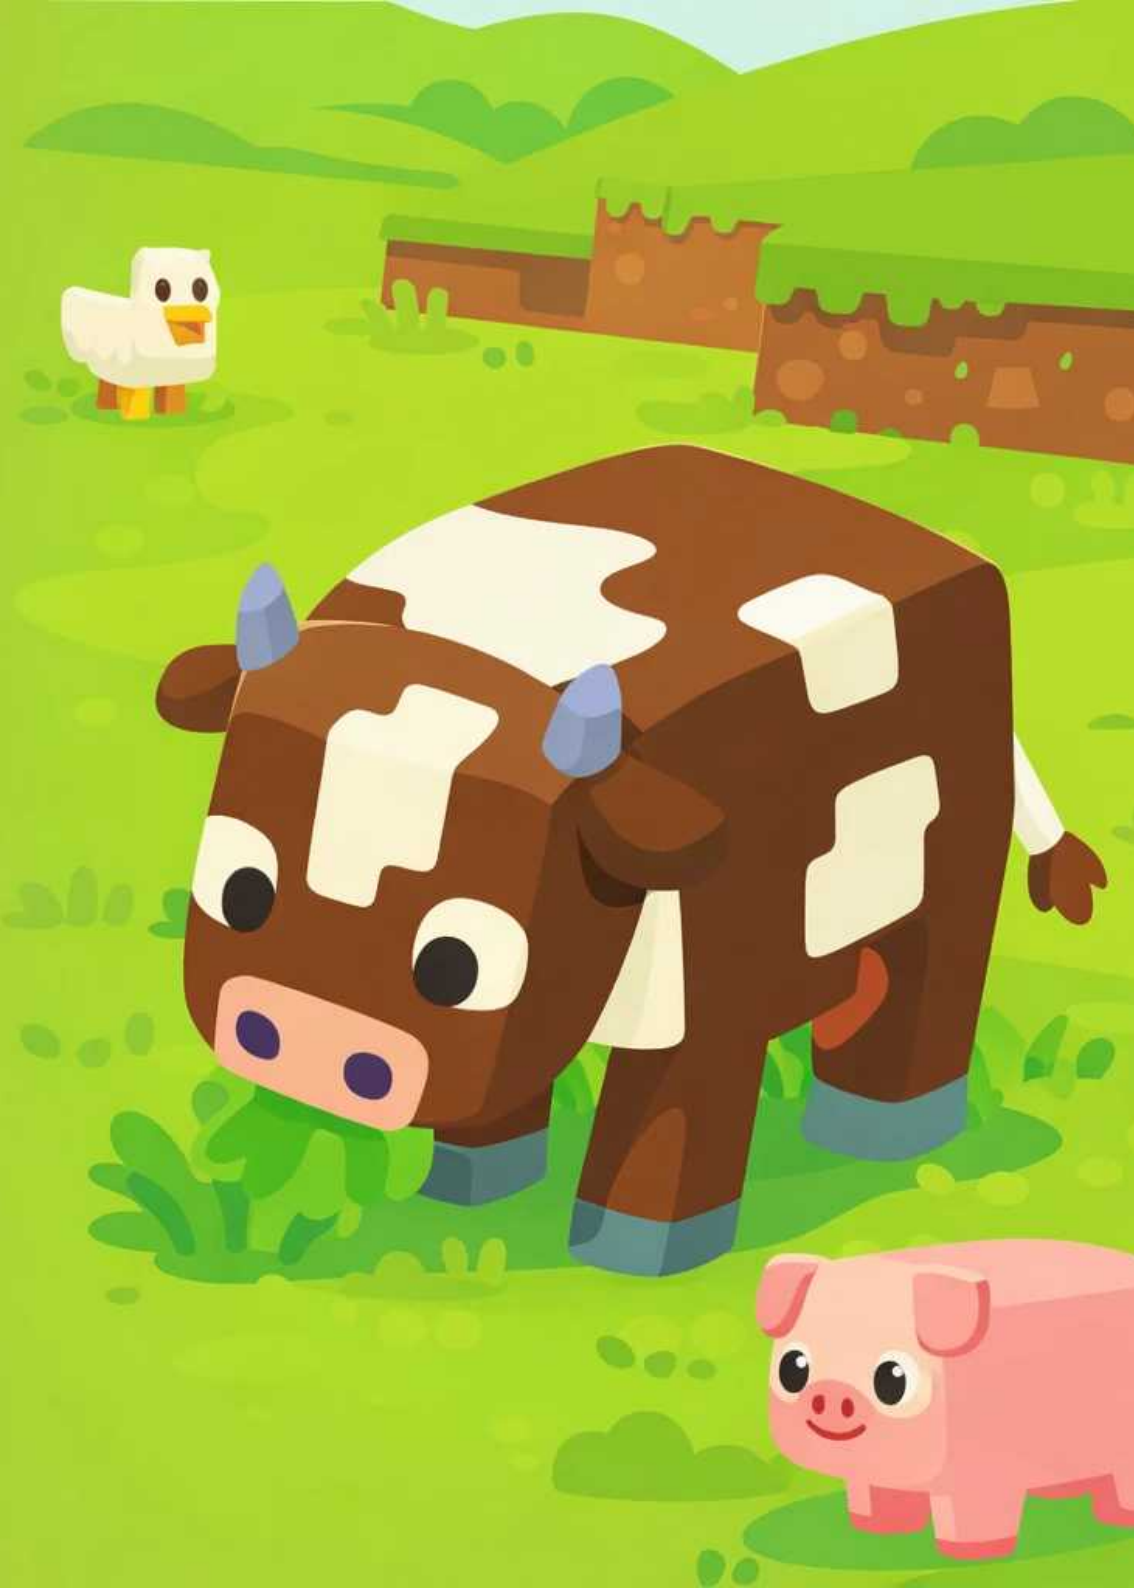
Cows, pigs, and hens **stay** in the **plains.** They spawn in many packs, so a meal is close by.

Horses can spawn in the **plains** as well. It is a good place to build or farm.



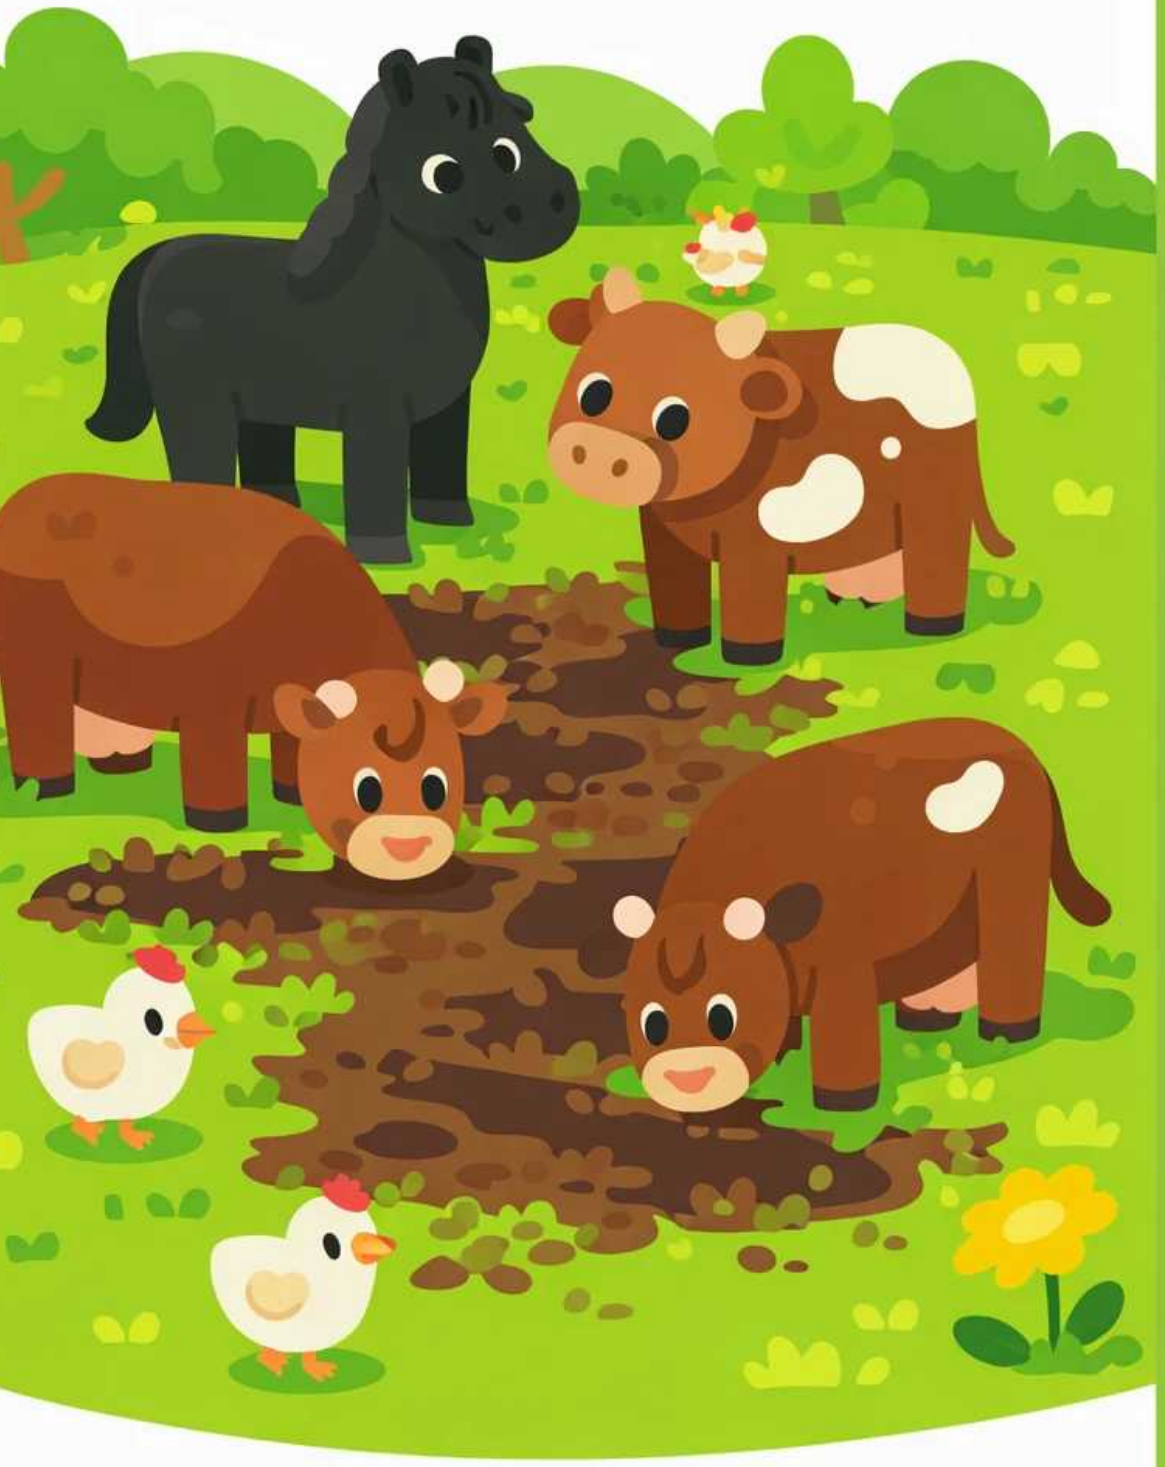
Plains have lakes where you can fish. It is a fun **way** to get food. Cast your line, and you **may** get a cod!

Most mobs in the **plains** eat grass. They do not want to fight.



Some **plains** have fields of sunflowers. Others have wildflowers.

But on **plains** like these, too many animals **may** eat all the grass.



Cows and horses have big hooves. They can leave a **trail** of torn-up land. Small hens do not rip the grass.

A farmer must make sure they **raise** the best animals for the land.

A Day on the Plains

Have you ever wandered across the wide, green plains of Minecraft? Cows munch grass, pigs snuffle along, and horses gallop in every direction you can see. You might spot sunflowers swaying in the sun, or fish leaping in a quiet lake. But what happens when too many hooves trample the same patch of ground? Can a clever farmer keep the land healthy for all? This decodable reader practices the ai/ay phonogram in words such as 'may,' 'plains,' 'stay,' 'trail,' and 'raise.'
