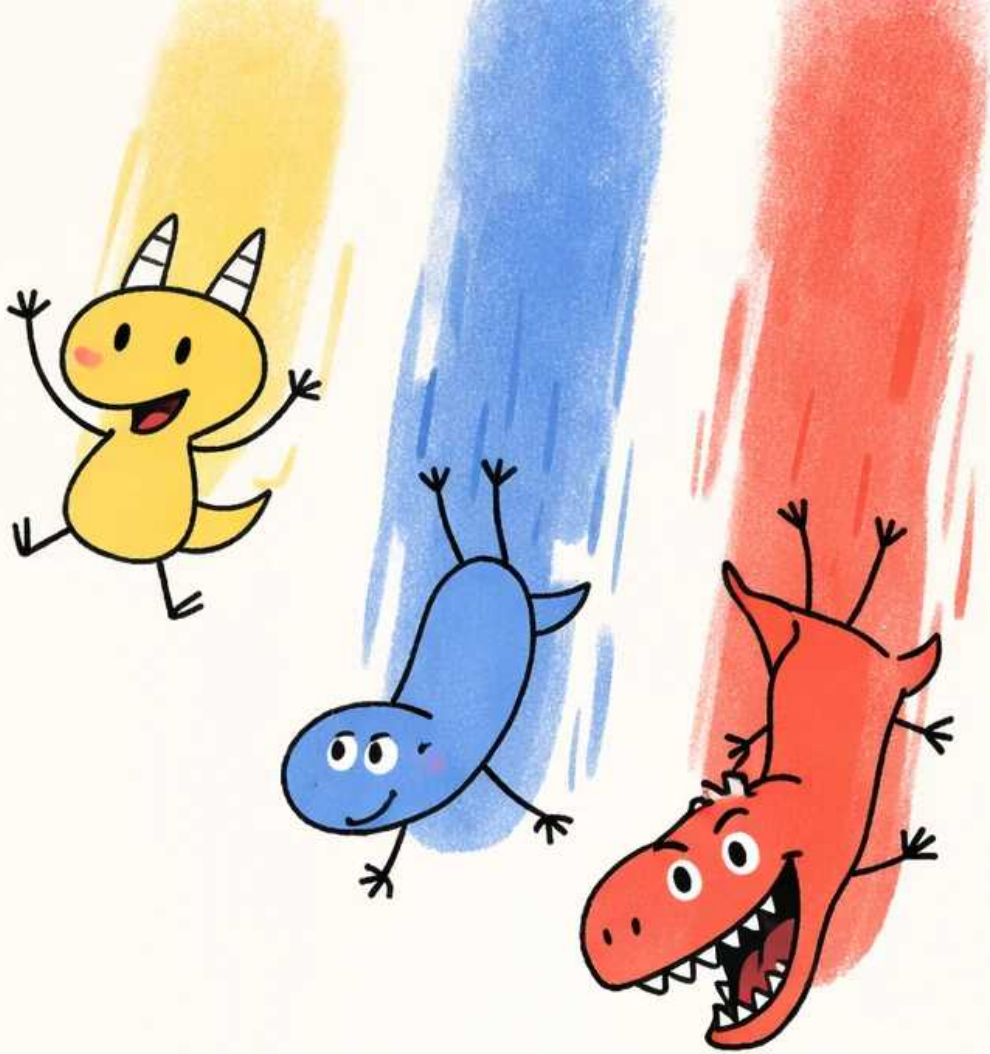
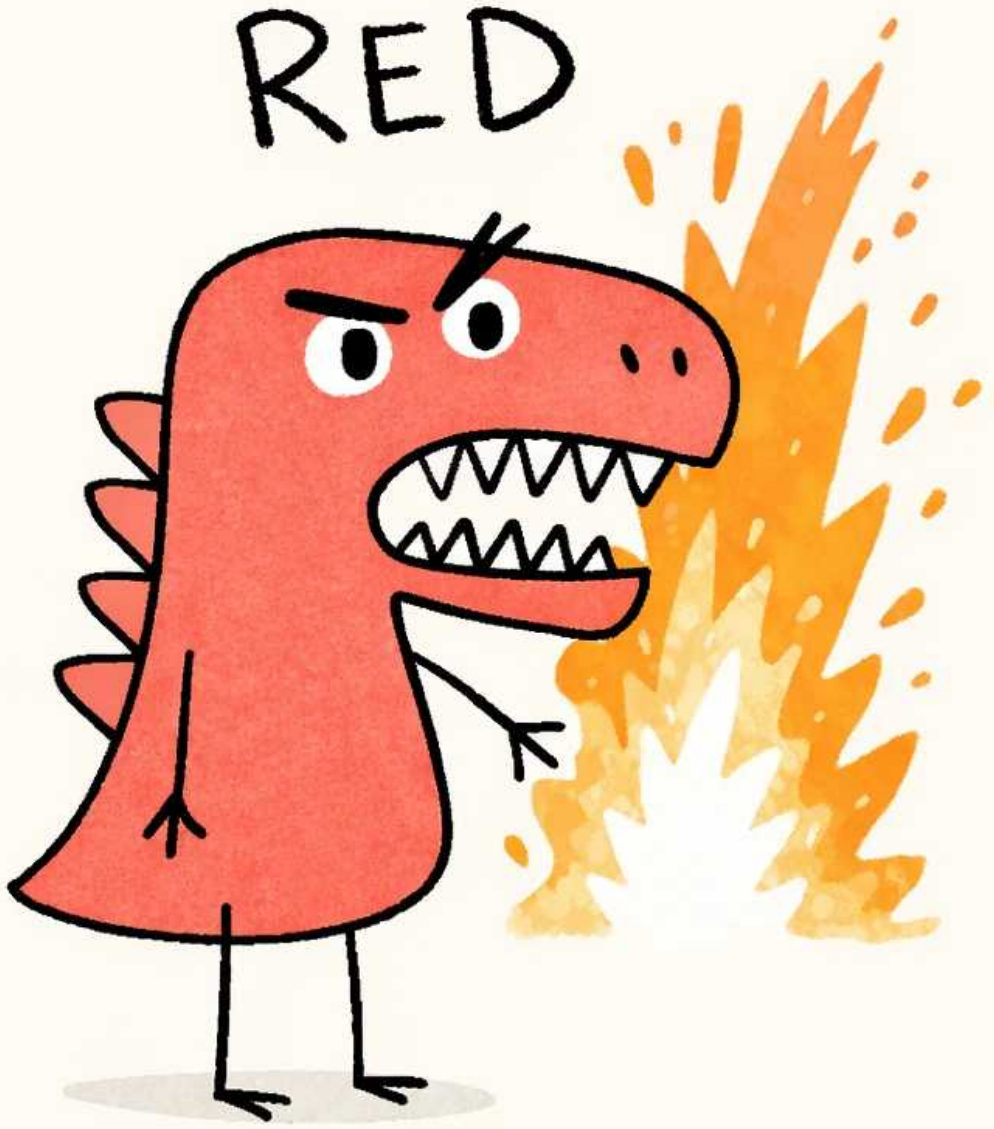
# Don't Mix All Three!

Just three colors can make a whole lot more. They are called the **primary** colors. Red, blue, and yellow are **primary.**





Red is a **dangerous, powerful** color. We call it a hot color. Think of hot, red things like lava.

Yellow is a warm color, too. It is more gentle. Think of warm things like the sun on a **beautiful** day.

# BLUE

Blue is a cool color. Think of swimming in a **wonderful,** clear blue lake.

So, how do you get more colors? You mix those **primary** colors **together.** Mix red and yellow, and you get...

Orange! These two warm colors make **another** warm color when they mix **together.**

Let's mix

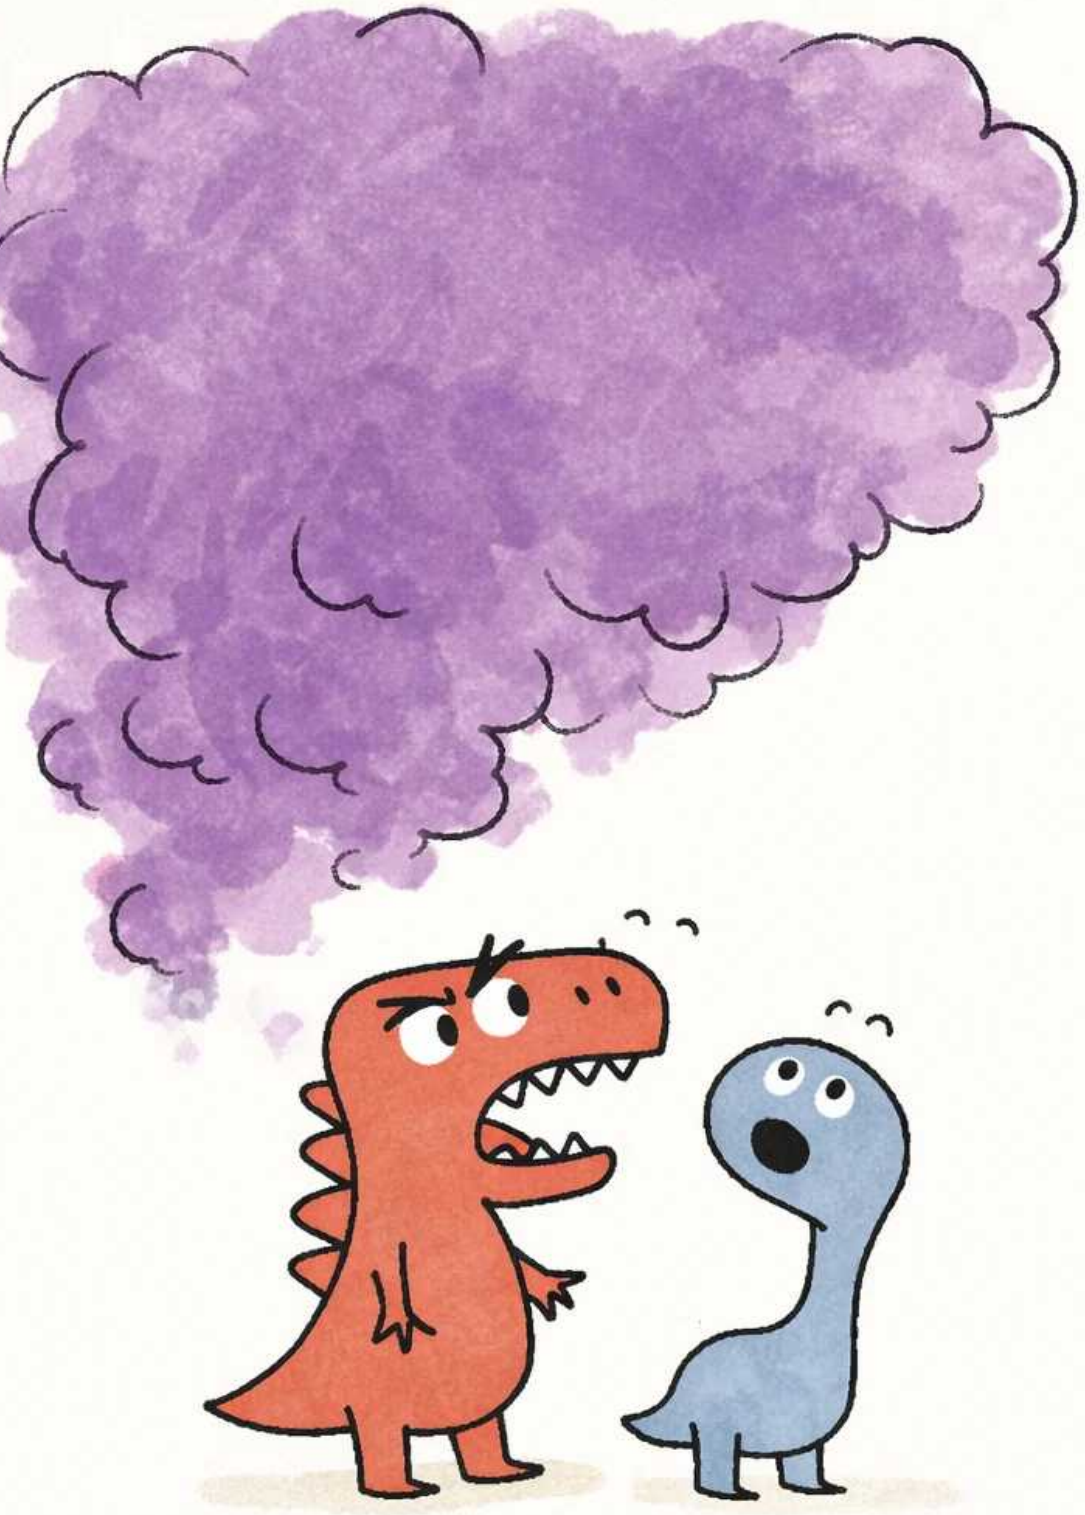
**together** red

and blue. I bet

you **already**

know what

color it will be.



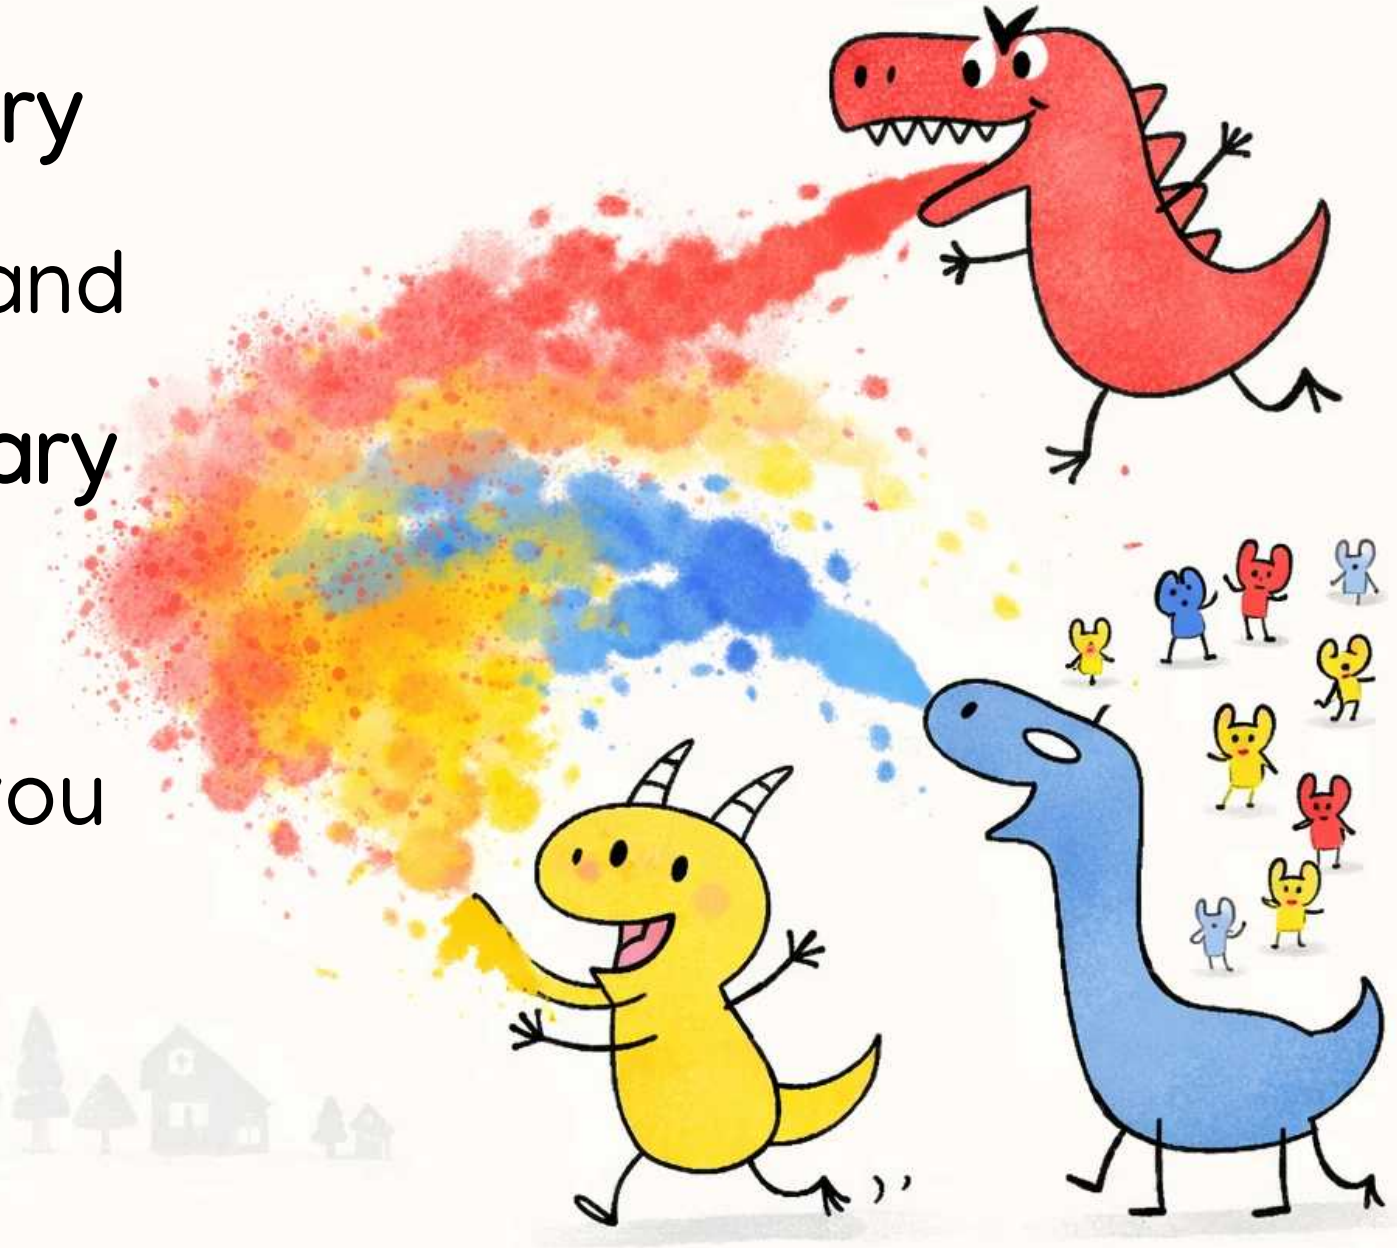
It's a **wonderful** shade of purple! When there is more red, it's a warm purple. When there is more blue, it's a cool purple.

Just one more pair to go. Get yellow and blue **together** for a party, and you create...

Green!

**Generally** it's a cool color. But add a lot of yellow to warm it up.

And there you have it! Mix the **primary** pairs **together,** and you get **secondary** colors. So, what happens when you mix all three at once?



Absolutely

incredible!

Mixing

colors

**together** is

**wonderful!**

S8

# Don't Mix All Three!

Red, Yellow, and Blue Dinosaur have one colorful job: paint the whole gray neighborhood! Red is bold and fiery, Yellow is sunny and giggly, and Blue has actually read the rulebook. Mix two colors and something magical happens - but what about that one big rule nobody is supposed to break? What could possibly happen if three silly dinosaurs mixed all three colors at once? This decodable reader practices 3+ syllable words such as 'beautiful,' 'dangerous,' 'incredible,' and 'wonderful.'

**Reading Skills:** 3+ Syllables

absolutely, already, another, beautiful, dangerous, generally, incredible, powerful, primary, secondary, together, wonderful
